An examiner's amendment to the record appears below. Should the changes be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended by the examiner as follows:

- On line 11 of **page 2** of the specification, "otational and axia" has been changed to -rotational and axial- in order to correct typographic errors.
- The description of Figure 2 on **page 2** of the specification has been changed to delete "perspective." Contrary to applicant's comments, since this figure lacks foreshortening and an apparent horizon, it is not a perspective. In fact, suggestion that it is in perspective worsens the impression that contacts 22a, 22b, etc. would interfere with the operation.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
